

NW POWER AND CONSERVATION COUNCIL

Speaker - John Fazio. John has been a systems analyst for the Pacific Northwest Power and Conservation Council since 1984. His primary duty is to assist in the development of the Council's regional power plan. He is the co-chair of the Council's Resource Adequacy Advisory Committee's technical subcommittee. He is a member (and former chairman) of the Institute of Electrical and Electronics Engineers (IEEE) Resource Adequacy Working Group, a subcommittee of the Risk, Reliability and Probabilistic Applications committee. He is also a member of the North American Electric Reliability Corporation (NERC) Probabilistic Assessment Working Group (PAWG). His work for the Council focuses on assessing power supply adequacy, resource cost effectiveness, impacts of alternative hydroelectric operations and climate change effects. John also provides analytical support toward the development of the Council's fish and wildlife program.

Presentation - The presentation on the Northwest Power and Conservation Council includes the following:

- What is the NW Power and Conservation Council and how does it interact with other regional entities?
- What jurisdiction does the Council have?
- How has the Council incorporated climate change into its planning process?
- What actions are being proposed by the Council to achieve a decarbonized future, in particular the president's goal of halving gas emissions by 2030?
