

PACIFICORP, INTEGRATED RESOURCE PLAN

Speaker - Will Shallenberger. Will is the Managing Director of Renewable Generation where he is responsible for operation of PacifiCorp's 3.4GW portfolio of wind, hydro, and solar assets across seven Western States. Mr. Shallenberger has also served in roles as director of hydro engineering, project manager, and project engineer. He is a Professional Civil Engineer and Geotechnical Engineer in the State of Oregon.

Presentation - The presentation focused on PacifiCorp's 2021 Integrated Resource Plan. PacifiCorp is a leading western U.S. energy services provider and the largest grid owner/operator in the West. PacifiCorp serves 2 million customers in six western states. The company comprises two business units: Pacific Power (serving Oregon, Washington, and California) and Rocky Mountain Power (serving Utah, Idaho, and Wyoming).
